

## WARRANTY and GUARANTEE

R-Grip provides an excellent solution for increasing the **anti-slip** properties of timber decks, boardwalks, bridges, steps and ramps. Once installed, R-Grip is easy and cost effective to maintain. Although UV resistant, some minor colour change can occur over a period of time; though this change has no effect on the performance of the product itself. Any repairs carried out, may appear different in appearance for a time until the environmental conditions even out this difference.

R-Grip comes with a **5-year** Warranty and Guarantee period.

Our guarantee for the performance of this product is subject to the following maintenance conditions:

- The area of R-Grip application is inspected at least once every six (6) months.  
Suggested things to look out are:
  - Areas that have been damaged by vandalism, namely fire, picking or attrition from sources such as powered bike or scooter performing “wheelies”.
  - Delamination between the built-up layers of the R-Grip product.
  - Discolouration in the finished product from situations where moisture may have penetrated through cuts or damaged timber routed edges that contain the R-Grip.
- That, at the most, every six months the area of R-Grip is washed down to remove any debris or contaminants from the surface. This is particularly important where the decking is close to muddy or sandy locations. The issue is not so much as damage to the R-Grip itself, but that sand or mud particles built up on the decking severely reduce the effectiveness of the anti-slip properties of R-Grip itself.
- Should any repairs be required, these shall be carried out by personnel authorized by the supplier, R-Grip Limited.
